

Product Overview

Our Reeded Glass Film Series offer's a versatile and visually appealing solution for enhancing privacy and elevating the style of glass surfaces. This film showcases a stunning Reeded glass texture available in 6mm and 13mm widths and effortlessly enhances glass surfaces with a sense of sophistication. Crafted with an optical PET film structure and boasting exceptional technical specifications, it seamlessly combines both aesthetic charm and practical functionality.

Benefits

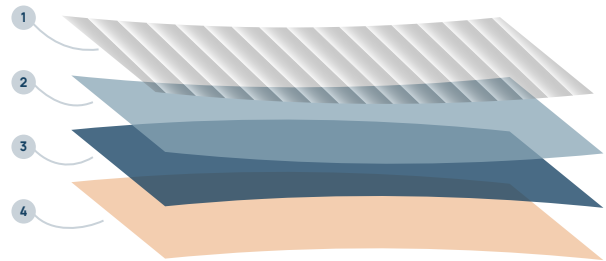

- ✓ Enhances privacy while maintaining natural light
- ✓ Adds a sophisticated reeded glass texture to glass surfaces
- ✓ Reduces harmful UV rays (UVR) by 40%
- ✓ Provides insulation against infrared rays (IRR)
- ✓ Resistant to acids and alkalis
- ✓ Durable and long-lasting
- ✓ Easy installation with strong adhesion
- ✓ Suitable for a wide range of glass surfaces
- ✓ Maintains its effectiveness in a wide temperature range

Installation and Maintenance

- ✓ Use a soapy water solution for installation and cleaning
- ✓ Do not apply any adhesive products on the surface of the film, as it may affect the product's effectiveness.
- ✓ Recommended for use on transparent or coloured flat glass surfaces.

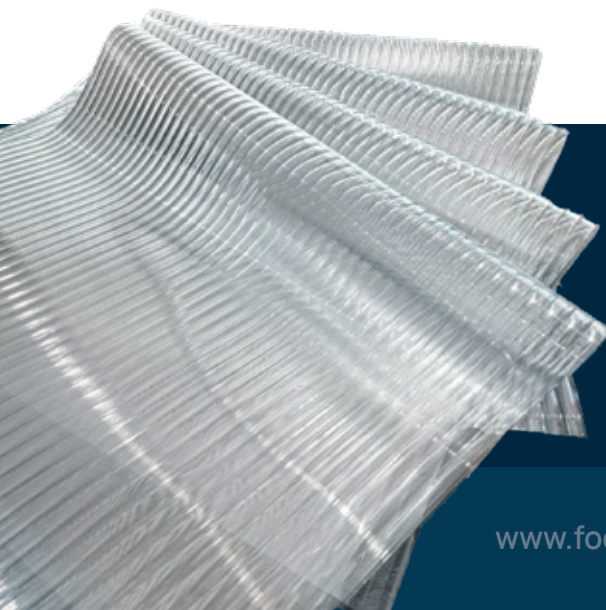

Reeded Film 4 Layer Structure

- 1 Surface Treatment Layer**
Provides the reeded glass texture for enhanced privacy and visual appeal.
- 2 Optical PET Film**
The core layer that ensures optical clarity and durability.
- 3 Glue Mounting Layer**
Facilitates easy installation and strong adhesion to glass
- 4 Optical PET Release Film**
Protects the adhesive layer until installation.

Technical Parametres

Thickness	70 microns (u)
Width	1520 (mm)
Haze	89.2%
UVR (Ultraviolet Ray Reduction)	40%
IRR (Infrared Ray Reduction)	28.6%
180° Peel Adhesion To Glass Retention	≥400 grams of force (gf)
Acid Resistance	≥800 hours
Alkali Resistance	≤4.0%
Maintenance Temperature Range	-5°C to 35°C
